

REMARKS

The foregoing amendments to the specification are presented in order to cross reference the parent application, the International application, and to claim benefit of priority of the provisional application.

Further, the amendment to the specification at pages 4 and 5, also amended in the parent application, are presented in order to correct a minor error in units. The correct units for creep (%) are shown on page 5, lines 15 and 17 and again on lines 21-22 as well as in the examples. The units (%) also conform to the definition of creep on page 3, lines 22-25.

It is respectfully submitted that the present application is in a condition for allowance and a Notice to that effect is earnestly solicited.

Respectfully submitted,

PILLSBURY WINTHROP LLP
